Responding to Coronavirus (COVID-19)

New Coronavirus (COVID-19) safety measures on Wilmot Place

Dear Resident / Business, Local group,

Summary

- **We are making changes on Wilmot Place to make it easier for you to walk and cycle in the area to reach key locations in response to Coronavirus (COVID-19)**
- **We will be reducing traffic levels on Wilmot Place making it safer for pedestrians and cyclists**
- **Work will start on the 25th May from 8am – 5pm**
- **You can share your comments on these changes via safetravel@Camden.gov.uk**
- **You can find out more about these changes on our website <https://www.camden.gov.uk/making-travel-safer-in-camden>**
- **Make your suggestion for locations you think need changes via <https://camdensafetravel.commonplace.is/> , email or call us using the details above**

The Coronavirus (COVID-19) pandemic has created new road safety challenges in Camden that the council is taking seriously. We want to make it easier and safer for people to walk and cycle locally, shop on their local high street, reach their local green spaces, schools and NHS sites, all while maintaining physical distancing. We are also looking to tackle future challenges caused by changes in the way that people travel once lockdown restrictions are eased. This includes a predicted rise in walking, cycling and car use with people less likely to choose public transport.

To respond to these challenges quickly we are making a series of safety-based changes to streets in Camden. Included in this letter is:

- Detail on the changes being made in your area
- A drawing showing the changes being made
- A drawing showing who we have notified
- Information on how to find out more

How are we responding to Coronavirus (COVID-19) safety issues?

We have identified a number of locations across the borough to begin to tackle the safety issues, including that proposed in your area. These initial locations have been chosen as they meet one or more of the following criteria:

- New safety issues physical distancing, walking or cycling have been highlighted to us as a result of Coronavirus (COVID-19)
- Before the pandemic there had already been some local community engagement from existing projects which highlighted issues which we are looking to address
- They are areas where we can make it easier and safer for people maintaining physical distancing while walking and cycling locally, to shop, reach their local green spaces, schools and NHS sites

These safety measures include looking at widening pavements, reducing through traffic on residential streets and creating “pop-up” cycle lanes. This will make it easier for people to access amenities and to use local roads to journey to key destinations or simply for exercise while staying 2m apart.

You can also tell us your own suggestions for other locations by using our dedicated website which can be found here: <https://camdensafetravel.commonplace.is/> or by emailing us at safetravel@Camden.gov.uk .

What is the challenge on Wilmot Place?

Overall the number of vehicles using our roads is down but speeding has increased as a minority of irresponsible drivers take advantage of quieter roads. In London some average speeds are being recorded at 37mph on 20mph roads. The Metropolitan Police traffic team has been widely reported in the media recently, sharing that the number of speeding drivers recorded has risen by nearly 8-fold compared with the same period last year.

Once the lockdown is eased the predicted rise in walking, cycling and car use will also mean a change in the way people travel in the area with extra pressure on streets. We are aware that physical distancing requirements have meant that some areas of pavement are now too narrow for pedestrians to use safely.

We know from previous engagement with the local community and stakeholders via the Kentish Town Healthy Streets project Commonplace map, that there is a concern that Wilmot Place and Rochester Road are being used by motor vehicles to avoid the junction of St Pancras Way and Camden Road. In order to respond to this issue we are going to be adding barriers and a bollard on Wilmot Place near the junction of Wilmot Place and St Pancras Way to prevent through traffic.

What will the work involve?

The change we will be making on Wilmot Place is as follows:

- Preventing through-motor traffic along Wilmot Place and Rochester Road by installing barriers and a droppable bollard near the junction of Wilmot Place and St Pancras Way.

- There will be some noisy work while we install the bollards which will be completed on the 25th May between 8am and 5pm

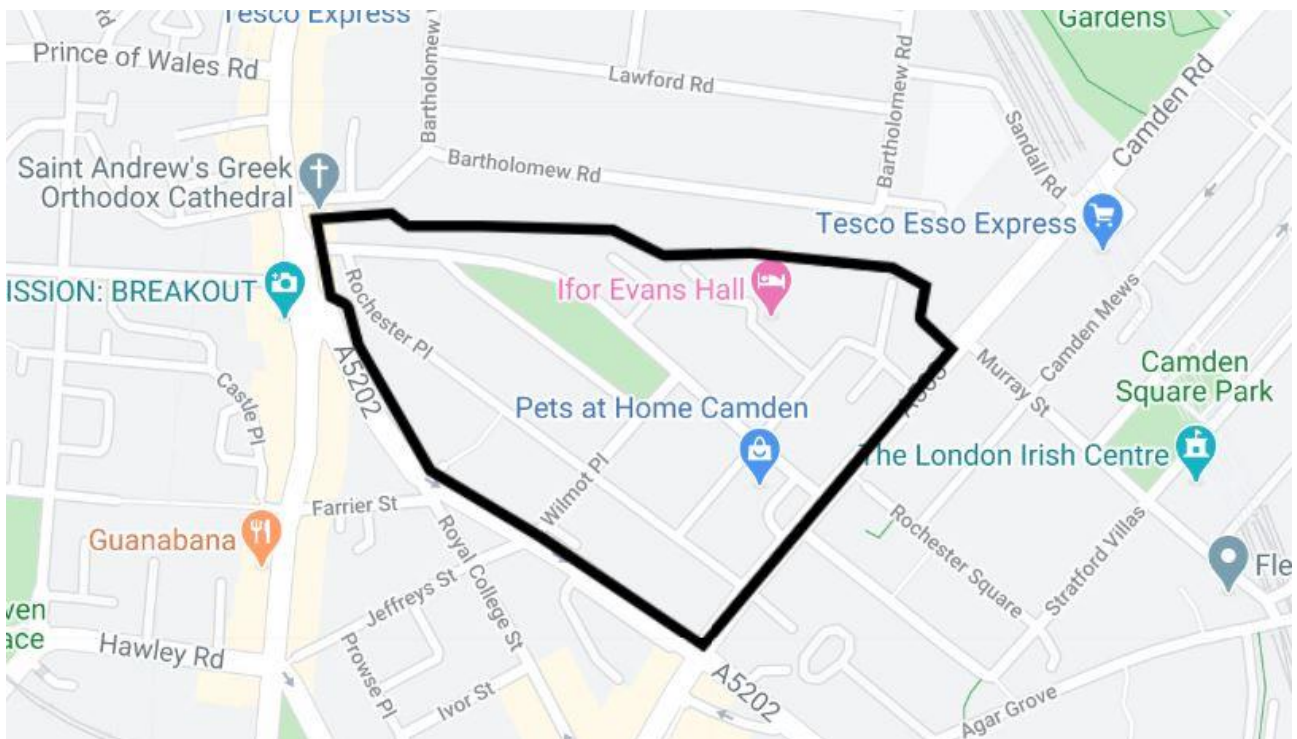

Access to all properties on both sides of the restriction will be maintained so you will still be able to reach your home by car and receive home deliveries but through-traffic will be prevented. Pedestrians and cyclists will be able to travel through at all times. Emergency services and bin collection teams will be able to lower the bollard for access.

This change will reduce the amount of motor vehicles moving through these streets making it safer for people walking and cycling locally, to shop and reach the entrance to Rochester Terrace Gardens. A drawing of what these changes will look like is included with this letter.

How can you give your views?

We know that there is an immediate need for this safety improvement in response to Coronavirus (COVID-19) so we are using Experimental Traffic Orders which once made can be brought into force relatively quickly.

We have already consulted with statutory emergency services on these changes, who have raised no objections. We are also notifying local residents, businesses and stakeholder groups within the local area and you can see the map of those notified overleaf. You will also see information going up on the local streets and on our website.

The experimental scheme will run for 18 months and you are able to comment at any time on the changes we have implemented. The Council would like to carry out a full public consultation after the experimental scheme has run for 12 months and will take a decision as to whether it can do this nearer the time in light of the circumstances then prevailing. This consultation will then inform the Council's decision as to whether, at the end of the 18-month experiment, the changes should be made permanent. Traffic levels will also be monitored, as required, on relevant streets after the scheme is implemented.

We will be in contact with you again with more details on this closer to the time.

How can you find out more?

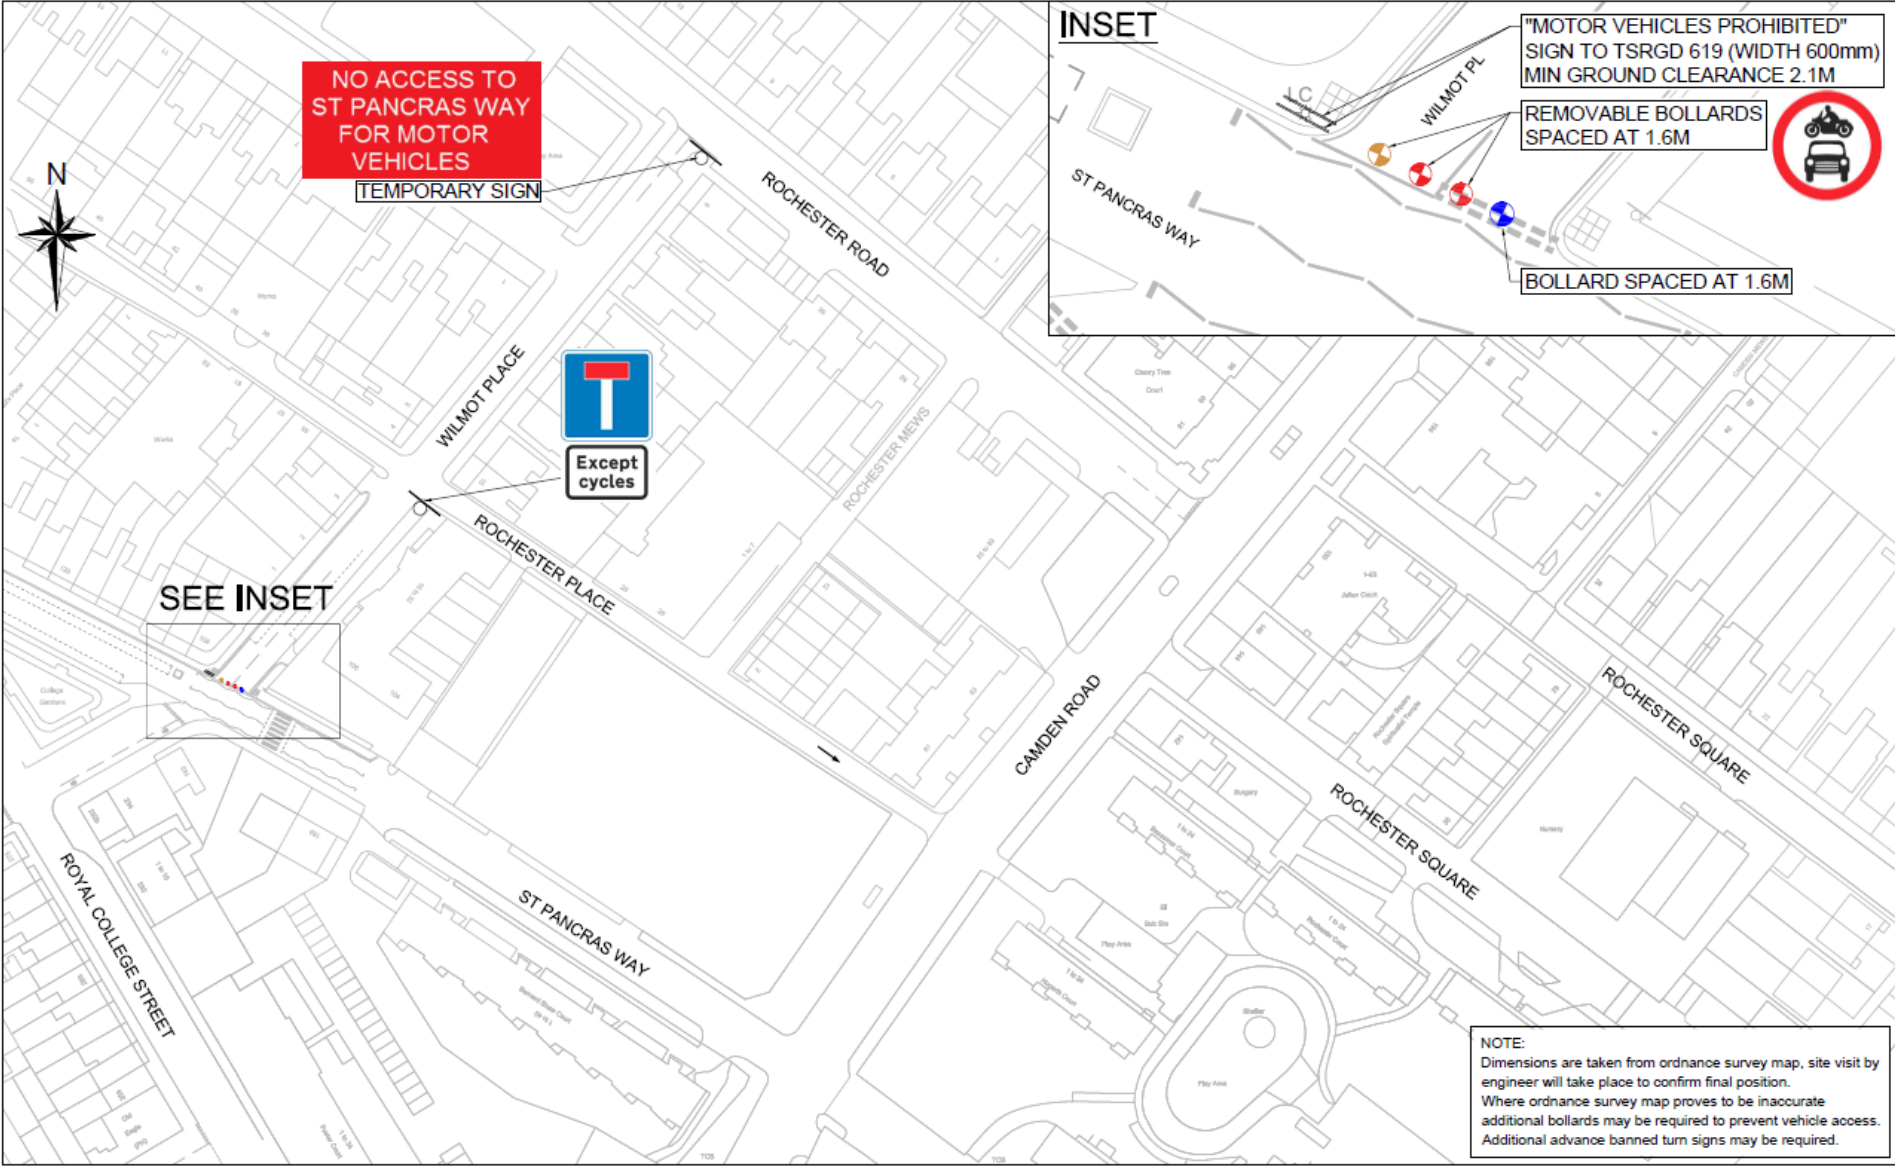

More information on these schemes will be added to our website shortly
